

MINI CONTROLLER DEVICE BUTTONS

CONNECTION WITH SMART DEVICE THROUGH BLUETOOTH

The **EnginoRobot BT** app, free of charge, is available on Google Play or Apple Store. The app simulates the actual controller and can be used wirelessly, once the controller is connected with the smart device through Bluetooth.

The **KEIRO™ software** is also available free of charge on Google Play or Apple Store. It is a Scratch-based graphical programming platform which can either be used on **PC** or a **smart device**. It allows all the features of digital programming including statements, conditional statements, operators, functions and variables.
